A word from the Founder

Welcome to The ETHsekai's first elite society, Waifu Harem Club. A membership community with the goal to bring all the joys and passion of Anime to life, shonen, shoujou, ecchi, and all. We started our work from the Waifu culture, because we feel that NFT and the principles of ownership that it represents works really well with the ideas of characters and IP, especially something as intimate as a digital wife - This is something that you want to own exclusively to yourself and no one else.

Waifu Harem club is composed of 10,000 beautiful and sexy NFT Waifus in the ETHsekai who will be by your side, fighting with you and serving you well. While we understand that the NFT space is in its early phases and look forward to mainstream mass adoption when the rest of the Anime and weeb community joins in on the edream to make Anime and isekais a reality on the blockchain, we want to maintain the elite Waifu Harem Club as an elite society of early adopters. We are, as Krito was, the Beta Testers.

Each Waifu NFT is not just an art, but is the ownership of the Waifu that lives in the ETHsekai. It should be noted that while we will be reinvesting the proceeds from the sale of these Waifu NFTs into various new ventures, some for its investment benefits such as crypto mining, and others downright cool like VR, AR, and gaming, there is no guarantee for profit, and this is NOT an investment. Waifu NFT holders do not receive dividends or royalties and we are, in the current stages, not creating and/or attaching an ERC20 token to any of our Waifu NFTs.

It is the Club's absolute privilege to pioneer the realization of Waifus within the Animetaverse space space, a special privilege that we would like to share with you all. Together, we will bring mass adoption to Anime and live out our passion.

Thank you,
Waifu Harem Club

Why Waifu NFTs?

The popularity of manga and anime is growing, and this trend is likely to continue. More and more people are discovering that 2D is just better, and this is evident of the surge of Anime inspired projects in the NFT space

But that is nothing compared to what will happen when the Metaverse becomes a reality! As many of you can imagine, anime will be huge in the Metaverse.

Metaverse, a series of virtual reality worlds that users can interact with, is coming! Billions of dollars are being spent to build it. You can bet that it will have a section exclusively focused on anime.

What is more, NFTs will be a massive part of that future. Why? Well, Imagine that you can jump into your favourite anime universe and be with your Waifu! Now, imagine if that Waifu was unique, one of a kind, just for you.

NFTs will help make that future a reality. Since anime existed, there was an existential problem for men of culture. For every 2D Waifu that's out there, thousands of other men want her.

So far, there was no way for them to resolve their dispute. Now, with the power of NFTs, we can solve that issue. NFTs, give you the ability to prove that your 2D Waifu is just yours!

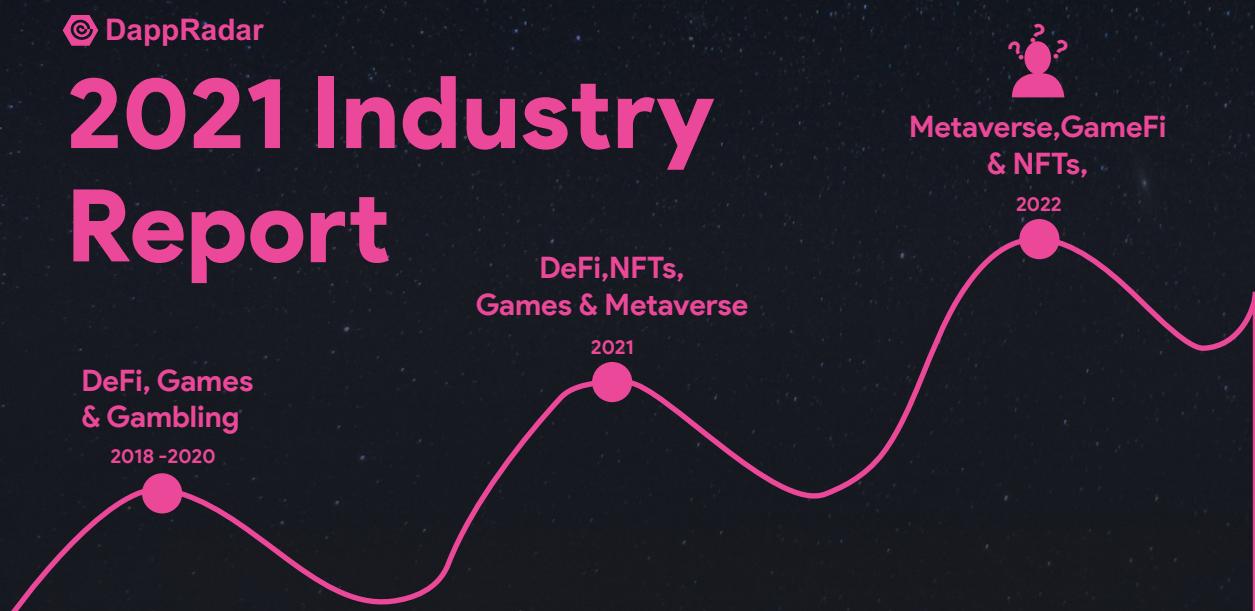

Sure, they might be able to take screenshots of her, but that's no different than someone taking pictures of your girl. No less creepy either!

NFTs General Market Overview

According to Forbes, NFT market generated over \$23 Billion in trading volume in 2021. Some of these unique arts went for Tens of Million Dollars, with different brands, companies and individuals leveraging on the uniqueness of the system, the explosion is just begun.

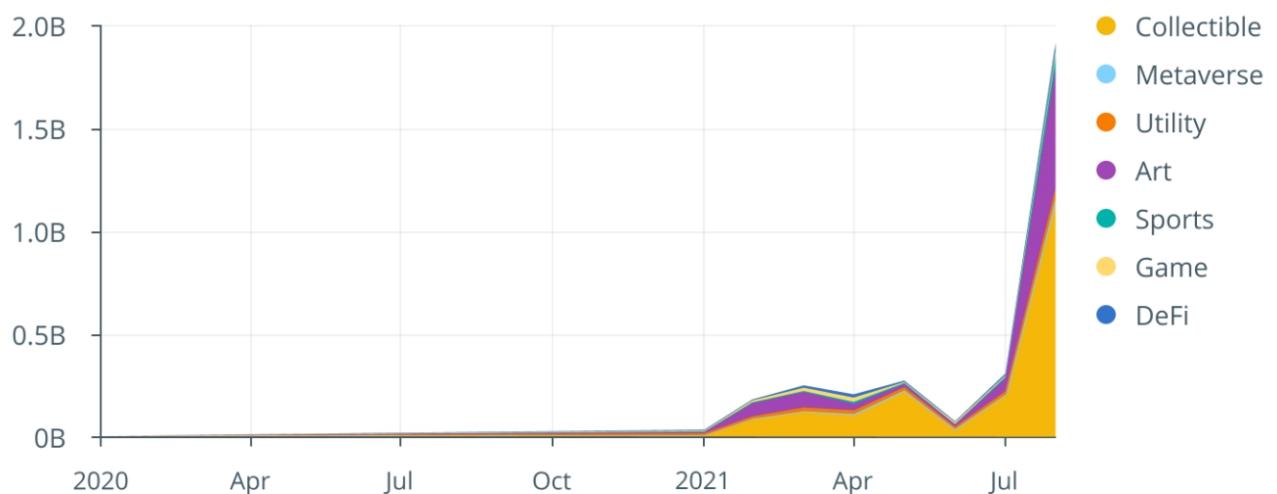

DappRader records have it that the 2021 year is one of the most critical for the NFT industry compared to the previous year 2020 which was considered a year of preparation

Waifu Harem Club's Mission

Our vision is inspired by isekais like Sword Online, which we can bring to reality. Our mission is to create a part of the decentralized Animetaverse Isekai that all our fellow weebs can enjoy.

We have to build the most alpha anime and weeb community in the crypto space to do this. NFTs are a significant step in that masterplan.

The Waifu Harem Club is for the cultured intellectuals and elites, so our Waifus are equally bold, and sexy of the highest calibur. We will also create a feature to unlock the NSFW version of your Waifus.

Other than the art, the project will also have great utility. The first step in this project will be to bring our Waifus to life.

First, we will allow you to view your Waifus live in our dedicated portal, a virtual showroom for you to see your Waifus in the digital world. You will be able to customize their names, backgrounds, voices, and more. Then we plan to bring your Waifus into the real world with 3D models and AR.

Moreover, holders will be able to stake their Waifus into Waifu Mining Operations, as well as other additional benefits to come. for additional profits. More utilities will be coming in the future, such as gaming and merch.

♥What is ETHsekai?

The ETHsekai is a fantasy world that exists on the Ethereum Blockchain that is home to 10,000 beautiful and luscious babes, who are waiting for you to bring them along as your Waifus and save their world.

ETHsekai is home to the Waifu Harem Club. An exclusive club that is for all the heroes and their Waifus.

You can bring your Waifus to life in the ETHsekai, from giving them a unique name and background to giving them voices.

You will also be able to view and showcase your Waifu Harem in a dedicated showroom. Your Waifus will be hard at work whether you're adventuring in the ETHsekai or hodling, giving passive benefits to members.

Your Waifu NFTs will also entitle you to the full commercial and creative rights to the Waifus, so you are free to do whatever you want with them. Lastly, they allow you to the membership in the Waifu Harem Club, with access to other collections, rewards, and many more surprises to come!

.

Waifu NFT Collection

The Genesis Ahegao Waifus will be a 10,000 collection of unique, first edition Waifus.

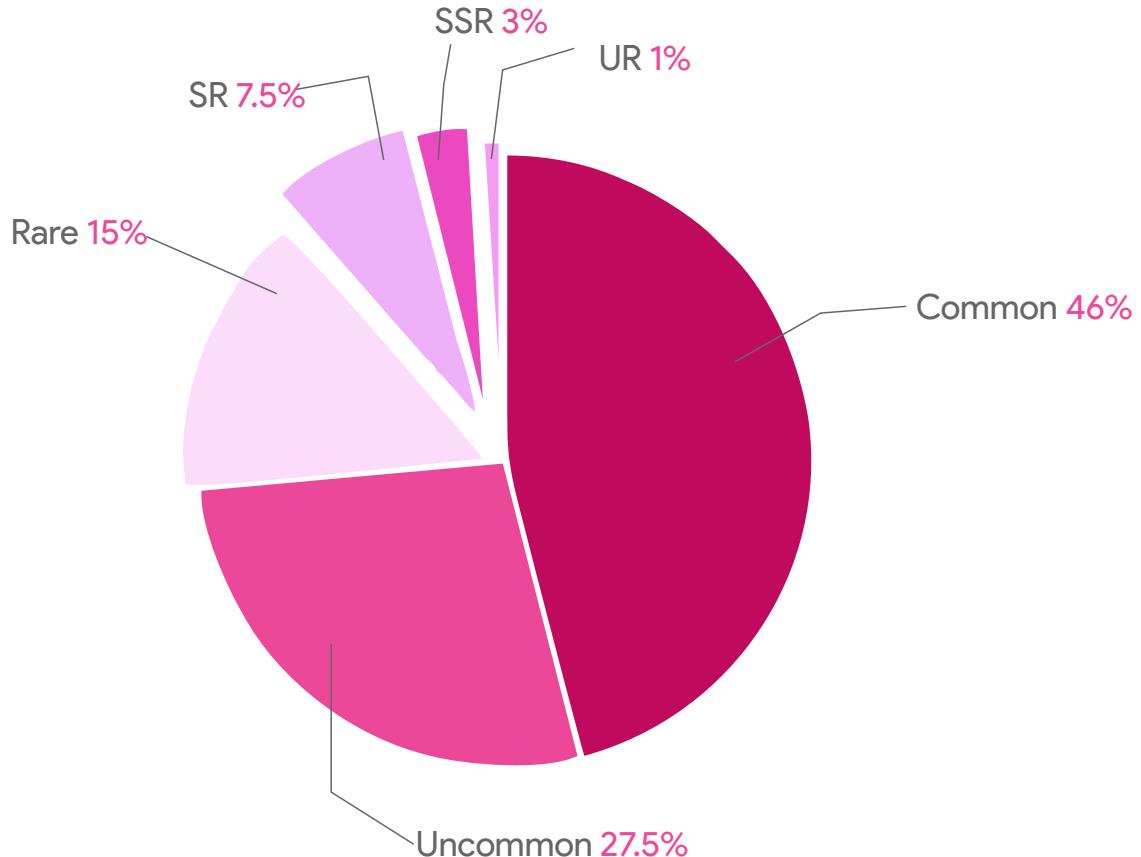

The Waifus will be divided into tiers that show how rare they are. Buyers will be able to quickly see how rare the Waifus are by their background colour, design and pattern.

Waifus will have six rarity tiers:

Common (C), Uncommon (UC), Rare (R), Super Rare (SR), Super Super Rare (SSR), and Ultra Rare (UR).

Proportions of the rarity are as follow:

4600 common, 2750 uncommon, 1500 rare, 750 SR, 300 SSR, 100 UR

UR Waifu

Only 100 exclusive Ultra Rare Waifus will exist and 20 of them will be reserved to be airdropped to some of the earliest backers of the project. Oh, and they will be the only Waifus that will feature topless designs where you will be able to unlock fully nude versions as unlockable content. Additional pre-generated Waifus from collabs, contests, and other special events will also be in the UR rarity.

Dynamic Pricing

Moreover, due to dynamic pricing, early backers will enjoy lower mint prices than others. Starting from 0.4 ETH, every 2,500 minted will increase the price by 0.02 ETH. The official NFT will be censored, specifically their nipples will be censored when they're shown on Opensea, etc., but they will be able to download the uncensored version from unlockable content.

Starting price - 0.04 ETH

2,500 mints - 0.06 ETH

5,000 mints - 0.08 ETH

7,500 mints - 0.10 ETH

6.9% royalties

6.9% royalties

0.04 ETH	0.06 ETH	0.08 ETH	0.10 ETH
Starting price	2,500 mints	5,000 mints	7,500 mints

Order your Waifu

We do reward those that believed in this project from the start. But that won't be the end of the benefits. This is the earliest collection, and it will entitle its holders to exclusive benefits. Next generation of ETHsekai Waifus will be free for holders of the exclusive Genesis Ahegao Waifus, who will only have to pay the gas fee for them.

Holders will also be able to mint Voiceline trait NFTs that can augment their Waifus and give them voices.

Lastly, there are no plans for future Waifus to have the Ahegao feature and will be exclusive to the pioneers.

Reinvestment of the proceeds

20% Waifu Mining Operation

Part of the proceeds from the initial sale will be invested into WHC's Waifu Mining Operation, including the purchase of mining rigs as well as operational costs. Members will be able to stake their Waifus for a probabilistic curve of being rewarded based on time staked and rarity.

The point of this idea is to lower the barrier to entry for investments into the crypto space. Many assets in blockchain tech, such as buying a mining rig, require a lot of capital. With the Waifu Mining Operation, members can be part of the blockchain economy even if they don't have the capital to invest economically on their own.

20% marketing and community building

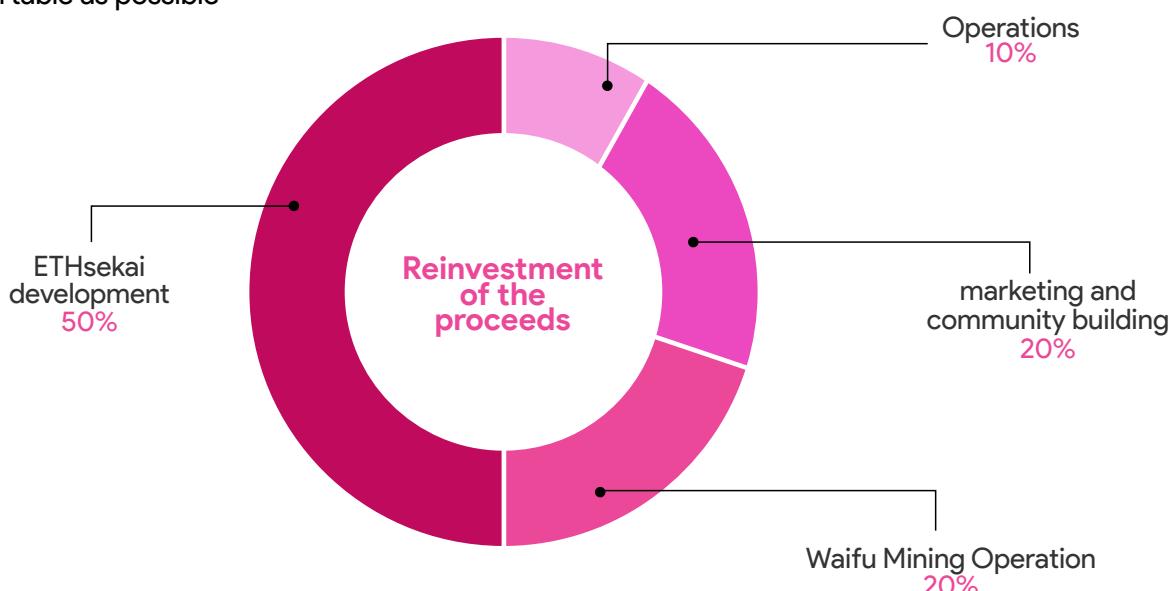

The club will reserve 20% of the proceeds for growing and maintaining the club with online and real-life events and securing benefits for our members.

50% ETHsekai development

Majority of the proceeds will be used to making the ETHsekai a reality. Our primary focus will be to enable the features necessary to bring the Waifus to life, with voicelines, interactions, showroom, and even AR/VR capabilities. In parallel, we will work on creating value for ETHsekai ecosystem with investments into gaming and the Metaverse.

10% - Operations

Remaining portion of the proceeds will be utilized to ensure the project runs smoothly, expanding the team, improving community relations, cybersecurity, etc. – anything to make the members of WHC as comfortable as possible

❤️ Road Map

2. Official Launch ❤️

The remaining Waifus will be available to the market with dynamic pricing growing to ultimately 0.10 ETH at 7,500 mints

Waifus will be revealed at the end of the official launch, and you will get to see your Waifus

4. Waifu Showroom and Quests ❤️

Once the launch concludes, the team will start to prepare the utilities for staking their Waifus. This will include purchasing and setting up the mining rigs in parallel with the features of the Waifu showroom.

The Future Roadmap ❤️

After the Waifu Harem Club member has made their views on the club's future known, will push forward to the Animetaverse and beyond!

Ultimately, this project will be in the hands of its community, but we have some ideas for the following steps to take.

1. Pre-sale ❤️

Set amount of Genesis AhegaoWaifus will be available for pre-sale for whitelisted intellectuals. The First 2,500 Waifus will be at 0.04 ETH

3. UR Waifu Giveaways ❤️

20 UR rarity Genesis Ahegao Waifus will be randomly airdropped to the first 5,000 joiners. The UR Waifus will be the only Waifus in the collection powerful enough to be topless. Holders will be able to reveal the uncensored version as unlockable content. Additional Waifus will be airdropped alongside UR Waifus

5. ETHsekaiWaifu Launch

New ETHsekai Waifus with new features will be created based on the direction of the ETHsekai. ETHsekai Waifus will be available for free + gas for Genesis Waifu holders

Merch

Because we believe in bringing Animetaverse to mass adoption, we will focus on merch. We have plans to release unique-custom-made pillowcases and oppai mousepads for the gamers. That means that you will be able to get a pillowcase and a mousepad with your own NFT Waifu!

We also want to create wearables, such as hoodies and other items. We want to merge Waifu into all aspects of life, so we will release Waifu merch lines with different art styles and collaborators. One of the first styles will be the traditional Japanese ukiyo-e art.

Ultimately, we will listen to the community for suggestions and feedback on our initiatives, including merch.

That includes what portion of the merch will go to sales to the public and what merch will be exclusive to Waifu Harem Club members.

ETHsekai Game

We think that gaming will be a huge part of the future Animetaverse, so a gaming utility is a must in the future.

We see the potential of joining an existing popular Metaverse game. For example, the project could buy some land in the Sandbox, and create an Snime corner for all the weebs there.

However, there's also potential to make our own anime-themed game, where all anime NFT holders could bring their anime avatars and Waifus and compete for the ultimate prize.

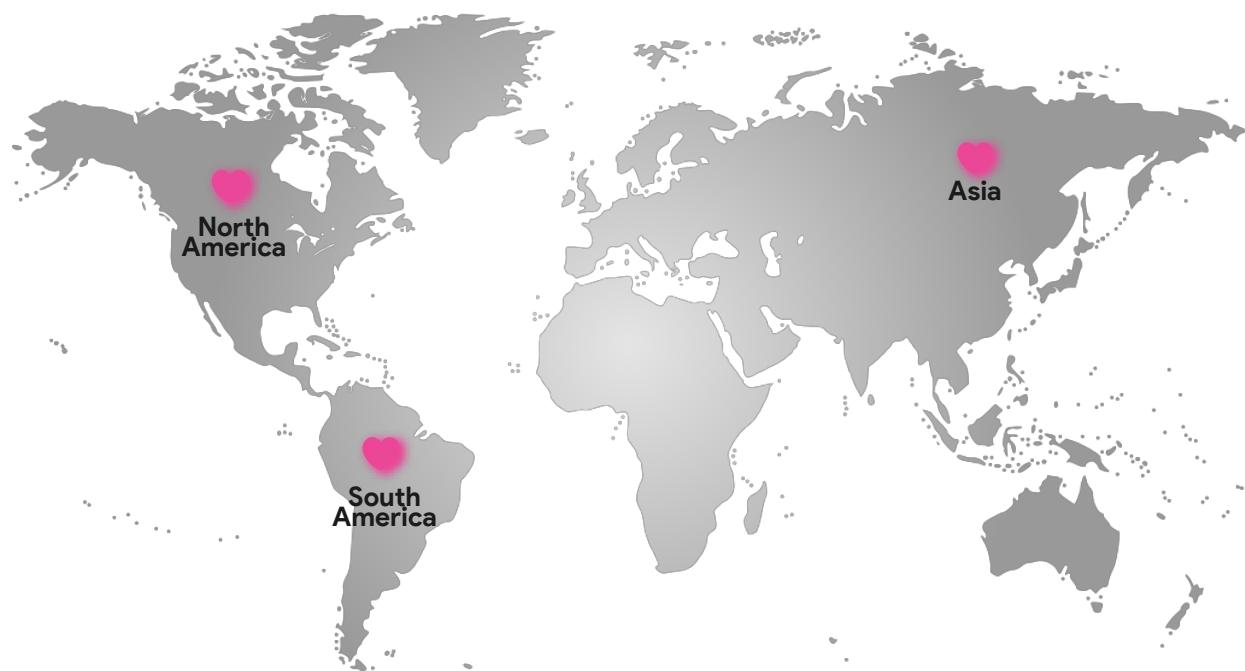

♥ Team

One of the core principles of the ETHsekai is to be wholly immersed in the Anime world. That is why we, as team members, want to distance their real-world identities from the ones we will create together.

However, we can say that the team comprises anime enthusiasts who are also highly skilled in financial services, blockchain, and eCommerce. We have what it takes to bring this project to fruition from the tech and the business standpoint.

We also have the advantage of knowing what the anime community wants because we are a part of it. We will use our expertise in technical knowledge and our understanding of deep Anime lore to bring this project to light.

Anime fans like you, our team and all our fellow Waifu Harem Club members should make their imprint on the future of tech and media. Join us in making the Animetaverse a reality!
